

# Kendox InfoShare

## Flexibility through Modularity

<b>Kendox InfoShare Client</b>	The efficient <b>Windows Desktop Client</b> includes all functions, including all administrative functions (permissions-based), and contains a comprehensive set of tools for document management and all related processes.
<b>Kendox InfoShare RIA Web</b>	<b>Rich Internet Application (RIA)</b> based on Microsoft Silverlight. The RIA client includes complete online DMS functionality for managing documents, digital records and processes. The “trusted application” feature allows integration with local applications and scanning tools . Efficient, secure web-based document viewer.
<b>Kendox InfoShare Mobile Web Client</b>	Access using <b>mobile devices</b> such as smartphones and tablets using Kendox mobile application (HTML/CSS/JavaScript). Responsive design – developed specifically for mobile devices.
<b>Kendox InfoShare Process Manager</b>	Define and initiate <b>workflows</b> using a graphical designer. “If-then” logic elements. Programmable for integration with other applications, databases and email systems.
<b>Kendox InfoShare Digital Dossiers</b>	<b>Organise documents and structured data in a logical fashion.</b> Flexible definitions for binders, extensive permissions-management functionality, temporary access to binders, templates and boilerplates, Microsoft Office/Outlook integration, import data from specialist applications.
<b>Kendox SCAN</b>	<b>Batch scanning application</b> developed by Kendox. Efficiently scan documents with support for OCR, barcodes, separator sheets, blank page recognition, forms, anchor and free text, UID/IBAN recognition, database connections, fully text-searchable PDF creation, etc.
<b>Kendox BATCH</b> <b>Kendox COLD</b>	<b>Import and convert data</b> for archiving. Large data volumes, batch mode. Separate documents, extract index values, convert file formats (e.g. AFP to PDF/A), batch testing modules, etc.
<b>Kendox Web API</b> <b>Kendox XML API</b>	Almost <b>100% of InfoShare functionality</b> , available both through an open Web API (Web Services, JSON/REST) or Windows API. Protocol-independent: uses Windows Communication Foundation (WCF). Simple, robust integration with specialist applications at no additional cost. Greater investment protection.
<b>SAP Archiving, Migration and Integration</b>	Specialist solutions portfolio for <b>SAP Enterprise Systems</b> . Highly efficient integration, scanning/COLD and InfoShare web applications with SAP archiving. Bidirectional process.
<b>System i (AS/400) Integration</b>	Integration solution for <b>IBM’s leading midrange system</b> . Modules include i5.Spool, i5.API, Monitor, Archiving, Application Integration and Migration. Kendox-specific tools for SCS, IPDS, AFPDS archiving.
<b>Application and Portal Integration</b>	Standard <b>integration modules for leading specialist applications</b> (ERP, CRM, FibU, CAD, PPS), <b>Microsoft SharePoint</b> and other web-based portal solutions.
<b>Email-Integration</b>	Interactive server-based <b>Email Archiving module</b> for Microsoft Exchange/Outlook, Lotus Notes, Groupwise and other POP3-based email applications.
<b>Kendox Business Cloud Solutions</b>	Document archiving and management in the <b>secure cloud</b> . Kendox Cloud Services are based on secure, up-to-date technology. Additional cloud features added on an ongoing basis.
